WHAT IS F1 IN SCHOOLS ?

International STEM competition F1 in schools requires students to use CAD/CAM design technology to collaborate, design, analyze, manufacture, test, and then race a working model car. The purpose of the tournament is to increase students' comprehension of STEM and Formula 1 while also enabling students to form an educated perspective on engineering as a future. This competition would provide fantastic exposure for your business along with excellent returns on your investments, with 26,000 schools from over 44 nations competing.

OUR ACHIEVEMENTS

We are proud to say that we have
the fastest car in out of the Schools
in Delhi, more than 35 teams took
part in this round

OUR GOAL :

Every day, we put our knowledge of design, business management, and engineering to the test in order to get the finest possible outcome. We are working hard to achieve our aim of winning the competition. We are proud of our current accomplishment which is having the fastest car in Delhi

Regional Round

35 Schools
Participated with
more than 200
Students

National Round

Best teams from all
over india
participate here

International Round

Students from 44
different countries
participate here

WHY US ?

Promotion of a positive brand image :

We will not be able to achieve any achievement or even make it to the final step without your help. As a result, by sponsoring us, you can help us realise our dreams and ambitions. This will boost your brand's reputation as a company that provides hope and dreams to students in their formative years.

Your gain Nationally :

We are one of the few Indian teams that compete in Formula One in schools. As a result, because we represent all Indian teenagers and students, the influence of logos on any product would be enormous because it would be exposed to both local and national Indian media.

Your gain internationally :

Since F1 in Schools is an international sport in which 44 countries compete, the influence of branding on merchandise would be felt globally. As a result, it would be an excellent opportunity to expand the company's reach beyond India.

THE RESOURCES WE REQUIRE

Your assistance would mean a great deal to us and greatly motivate us to continue moving forward with the same zeal. Of course, there are expenses involved as well. We'll need funds to manufacture the car, and we'd appreciate your assistance. With over 26,000 schools competing, you would also benefit from the exposure. It costs 35,000 INR, but you get a good return on your investment.
